OTHER INFORMATION
STANDARD EXPECTATIONS (ON SITE) WATER TANKS SHOULD STRICTLY BE 2000L CAPACITY
NB: If water reservoirs/Tanks and stands are not included in this quotation, you're required to set up water a tank stand that is at a height of at least 4.2m above the ground best to achieve the standard pressure required by our CdYi3 & Cdyi4 regulators. For 100m fowl runs and above, you're required to erect x2 x2000L water tanks (one at the beginning and another in the middle position (50m mark) of the fowl run (1.8m from the fowl run dwarf wall from outside). This layout must be gradient friendly

MORE TERMS
Out-grower Compliance: Please inform us in advance if you intend to be an out-grower for companies like Surrey, Irvine's, or Sable. This ensures our team installs equipment to their specific standards, avoiding the need for future remedial work. LEAD TIME: Workshop preparation typically takes 4-6 days, as equipment is semi-assembled to your dimensions before being transported to the farm rewrite this
